

Post and pin in your group's channel a one-page proposal with the following:

- Project title/description.
 - You Decide! - Display restaurants with best yelp reviews based your location and food criteria
- User story

As A user

I WANT to locate the best restaurant closest to me based on search criteria

SO THAT I can have a good meal.

GIVEN a map and food dashboard with form inputs

WHEN I search using selected criteria

THEN I am presented with a map of best nearby restaurants based on type of food

AS A user

WHEN I input my zip code and type of cuisine

THEN I am presented with the top 3

WHEN I view the results

THEN I am presented with restaurant location on map, restaurant website, and menu

- Project repository on GitHub.
